Department of Architecture
Second Semester 2017/2018**

**Local Architecture
0952481
Dr. Nabeel Al Kurdi**

Course Objectives:

The course introduces the students to local architecture in Jordan. The course focuses on the characteristics of building style as a reflection of social, economic, and technological change. The course emphasizes the process of analytical recording and aims at achieving a clear understanding of the construction and typology of buildings as necessary precursor to decision making.

Course Description

- Introduction: A brief history of settlement in Jordan
- Traditional Design and construction in Jordan: Materials, Design, Skills and Craftsmanship.
