-		y course	Mechani	cs of Machines 0944331+ System Dynamics and Control 0904418									
Co-requisites by course - Prerequisite for -													
TTerequ	lisite ioi		-		•	<u>a</u> 1							
Week			т	<b>T</b> opics	pics	Covered	Chart	ter in Text	Sections				
1	Kinom	atics of Partic		pics			Chap	ler in Text	Sections				
2-3	Kinematics of Particles Spatial descriptions Design Concepts												
4-5	_	d Kinematics	-	licepts									
6-7		Kinematics	,										
8-9		ans: Velocitie	s and Sino	larities									
10-11		ans: Static Fo											
12-13	Building robots with MATLAB												
14-16     Trajectory planning (Joint space and Cartesian space)													

0.0		Mapı	ping of Cours	e Outcomes	s to ABET	Student Outco	omes					
SOs	Course Outcomes											
1	1. Ability to derive the Forward & Inverse Kinematics of a simple robotic arm.											
2	<ol> <li>Ability to relate the joint velocities to the Cartesian ones and vice versa of a simple 2 degrees of freedom manipulator arm.</li> <li>Ability to use the concepts of Forward Kinematics, Inverse Kinematics, velocity propagation, singularities, static torques, and workspace to design a 3 (or 3+) degrees of freedom robotic arm.</li> <li>Ability, as a team, to design a 3 (or 3+) degrees of freedom robotic arm and show the details in a report.</li> </ol>											
3	5. Ability, as a team, to deliver an oral presentation.											
				Evalu	ation							
Assess	Assessment Tools Expected Due Date											
Midter	rm							30%				
Quizze	es/HWs	s/Project										
Final I	Exam							50%
