الأساتذة رؤساء الجامعات الأردنية

تحية طيبة وبعد،

أرفق طياً كتاب المدير التنفيذي لمؤسسة ولي العهد رقم (م و ع/تعاون/454/2023) تاريخ 2023/10/11 بخصوص بدء المؤسسة باستقطاب طلبات الدفعة الخامسة للتدريب لدى شركة (AIRBUS) لطلبة الجامعات الأردنية من مختلف التخصصات وتخصصات علوم الهندسة مع امتلاك مهارات في علم البيانات، تكنولوجيا المعلومات (أنظمة، حوسبة سحابية، ذكاء اصطناعي، علم البيانات، والتشغيل الآلي للعمليات)، وعلوم الطيران في تخصص الديناميكا الحرارية وذلك في مقر الشركة الرئيسي في مدينة تولوز الفرنسية تحت إشراف مباشر وتغطية لكامل النفقات من المؤسسة.

للتفضل بالاطلاع والايجاز لم يلزم ترشيح من ترونه مناسباً من جامعتكم ممن تنطبق عليه الشروط والمعايير المرفقة لكل فرصة تدريبية، مع الأخذ بعين الاعتبار الطلبة من ذوي النشاطات/ البحوث في مجال أو أكثر، وأن يكون لديهم الرغبة والمقدرة لإثبات اشتراكهم بتلك النشاطات و/أو الأعمال في مختلف المجالات وحسب المتطلبات المبينة في الملاحق المرفقة، وعلى أن ترسل طلبات تقدم الطلاب المرشحين إلى إدارة مؤسسة ولي العهد من خلال إرسال نسخ أصلية أو بإرسالها عبر البريد الإلكتروني الرسمي لرئاسة الجامعة مع كتاب تغطية يؤكد ترشيح رئاسة الجامعة للطلاب المتقدمين علماً بأن الموعد النهائي لتقديم الطلبات على البريد الإلكتروني (Oalhmoud@cpf.jo) هو يوم الخميس الموافق 2023/12/2، ولزبد من المعلومات يرجى التكرم بالتنسيق مع السيدة علا الحمود على رقم هاتف 06-5806161.

وتفضلوا بقبول فائق الاحترام

معالي الدكتور عزمي محافظه الأكرم

وزير التربية والتعليم ووزير التعليم العالي والبحث العلمي

الموضوع: التدريب في AIRBUS للعام 2024

تحية طيبة وبعد،

تهديكم مؤسسة ولي العهد أطيب الأمنيات بدوام التقدم وتحقيق الإنجازات. نتقدم من معاليكم بالشكر الموصول ل دعمكم الدائم لمبادرات وبرامج ونشاطات مؤسسة ولي العهد لما فيه مصلحة شباب الوطن. أرجو التلطف بالعلم بأن عمل مؤسسة ولي العهد قد جاء بهدف البناء على الجهود الوطنية المتكاملة، حيث تشرف المؤسسة على تنفيذ مبادرات شبابية برؤية "شباب قادر لأردن طموح"، بالإضافة لإطلاق سلسلة من البرامج والنشاطات الشبابية. أرجو معاليكم التلطف بالعلم بأن مؤسسة ولي العهد قد بدأت بإستقطاب طلبات الدفعة الخامسة من طلبة الجامعات الأردنية للتدريب لدى شركة (AIRBUS) في مقر الشركة الرئيسي في مدينة تولوز الفرنسية، والذي سيكون تحت إشراف مباشر وتغطية لكامل النفقات من قبل مؤسسة ولي العهد، حيث ستكون مدة التدريب من 4 إلى 6 أشهر تبدأ في شهر نيسان من العام القادم 2024 للطلبة من مختلف تخصصات وعلوم الهندسة مع إمتلاك مهارات في علم البيانات، تكنولوجيا المعلومات ( أنظمة، حوسبة سحابية، الذكاء الإصطناعي، علم البيانات، والتشغيل الألي للعمليات)، وعلوم الطيران تخصص الديناميكا الحرارية.

وعلى ضوء ما تقدم، أرجو معاليكم التكرم بالإيعاز لمن يلزم وبما ترونه مناسباً حول مخاطبة المعنيين في الجامعات الأردنية الحكومية والخاصة لتنسيب الطلاب المهتمين وممن تنطبق عليهم الشروط من كل جامعة ضمن الشروط والمعايير المرفقة بطيه المتضمنة الفرص التدريبية ومعايير الاختيار ووثائق طلب التقدم والالتحاق المطلوب تعبئته وإضافته مع كافة الوثائق "الملحق ب AIRBUS, candidate personal information and project description". آخذين بعين الإعتبار الطلبة من ذوي النشاطات/البحوث في مجال أو أكثر، وأن يكون لديهم الرغبة والمقدرة لإثبات اشتراكهم بتلك النشاطات و/أو الأعمال في مختلف المجالات وحسب المتطلبات المبينة في الملاحق المرفقة، وترسل طلبات تقدم الطلاب المرشحين إلى إدارة مؤسسة ولي العهد إما بإرسال نسخ أصلية أو بإرسالها عبر البريد الإلكتروني الرسمي لرئاسة الجامعة مع كتاب تغطية يؤكد ترشيح رئاسة الجامعة للطلاب المتقدمين، علماً بأن الموعد النهائي لتقديم الطلبات على البريد الإلكتروني (oalhmond@cpf.jo) هو الخميس 2 كانون الأول 2023. ولمزيد من المعلومات والإستفسار حول متطلبات وشروط التنسيب يرجى من المعنيين في الجامعات الأردنية التكرم بالتنسيق مع السيدة: علا الحمود - على البريد الإلكتروني (oalhmond@cpf.jo) ورقم الهاتف 06 5806161. شاكرين لمعاليكم وللوزارة الموقرة حسن تعاونكم الدائم والموصول. راجياً من الله العليّ القدير أن يوفقنا جميعاً لما فيه خير أردنتنا الغالي.

وتفضلوا معاليكم بقبول فائق الإحترام والتقدير،،،

المدير التنفيذي

## Airbus Internship Program 2024

*Internship in Improving aircraft weight simulation models using Big Data (m/f)*

What if YOUR adventure started with at Airbus!

Are you a computer science student looking for an opportunity to gain hands-on experience in a dynamic environment? We are looking for motivated students to join our team and help us improve our aircraft weight simulation models.

An internship opportunity in the "Improving aircraft weight simulation models using Big Data (m/f)" is available at Airbus. To apply, visit our website.

You will be working in the Data Engineering department, which is responsible for developing and maintaining the data pipeline for the aircraft weight simulation models. You will be working on improving the accuracy of the simulation models by using Big Data and machine learning techniques. You will be working on a project that is part of the Airbus aircraft weight simulation model.

### Your internship will involve:

collaborating with the Data Engineering team to develop and maintain the data pipeline for the aircraft weight simulation models. You will be working on a project that is part of the Airbus aircraft weight simulation model. You will be working on a project that is part of the Airbus aircraft weight simulation model.

collaborating with the Data Engineering team to develop and maintain the data pipeline for the aircraft weight simulation models. You will be working on a project that is part of the Airbus aircraft weight simulation model.

This internship will begin in March 2024 (date subject to flexibility)

**AIRBUS**

## Duties and Responsibilities:

Your tutor will help you identify your professional goals and support you in developing your skills. Your main activities will include:

- Collecting, cleaning and analyzing weighing data
- Calibration and improvement of our modeling methods
- This internship will enable you to develop the following skills:
- A good understanding of the different properties of aircraft weight
- The evolution of aircraft weight knowledge during the development cycle
- Statistics and data analysis

## Your boarding pass:

You are currently a Senior student (in Fourth or Fifth year) in faculty of an officially accredited university and currently pursuing a degree in engineering with data science skills and have the following competencies:

- Ability to structure, analyze and synthesize information
- Proactivity and autonomy
- Openness to other cultures will be an asset to be part of this multinational team
- Interpersonal and communication skills

## Language skills:

- English: advanced
- French: intermediate

Participating students will be selected based on criteria set by Airbus. For students to be considered for the Airbus Internship Program, they must adhere to the following criteria. As per Airbus guidelines, participating students are expected to be able to deliver on their projects and duties. The students should also be able to read and interpret technical drawings and job instructions. Lastly, participants should demonstrate a strong aptitude/quality awareness, in addition to autonomy and proactivity.

Students will be selected by adhering to the criteria included in this document.

## Criteria for application & selection:

1. Applicants must be Jordanian nationals.
2. Educational level: Senior student (in Fourth or Fifth year) in faculty of an officially accredited university and currently pursuing a degree as conditioned in the internship description.
3. Students must be at least 21 years of age.
4. Student must have a cumulative GPA of 3.0 or above or its equivalent standard 85% or above.
5. Student must show proficiency in English (or French) and have completed the IELTS or the TOEFL tests with a score of 5 or above for IELTS, 100 or above for the TOEFL internet-based test, or 250 for the computer-based test or 600 for the paper TOEFL-based test.
6. Student must demonstrate the successful completion of, or be currently working on, a project showcasing an interest and skills in your field of study.
7. Student must demonstrate abilities:
  - A. To proactively deliver on their projects and duties as per the set guidelines.
  - B. Work autonomously and in teams.
  - C. In reading and interpreting the technical drawings and job instructions.
  - D. To show a strong aptitude, quality awareness.

## Requested Documents:

1. Students must submit their full transcripts in English.
2. Students must submit a demonstrated successful completion of, or currently be working on, a project with a short write up describing the project and its outcome (maximum 150 words) in English.
3. Students must write a letter in English expressing their interest to join the internship program by answering the following questions:
  - A. Why should CNES choose my project? (Maximum 150 words)
  - B. How does my project benefit CNES and Jordan? (Maximum 150 words)
4. Students who have conducted research with a faculty member are invited to submit any paper(s) or publication(s) that came out of that effort.
5. Students must submit two letters of recommendation from their university faculty that they have worked closely with, or taken courses with, at their university specifically detailing the applicant's performance and why they qualify as a strong candidate for this internship.
6. Generic letters will not be accepted.
7. Students must submit a copy of their passport, valid at least until December of 2024.
8. Students must submit 1 passport photo.
9. Students must submit their resumes in English, in Europass format as a hard copy, to match the Europass style: <https://europa.eu/europass/eportfolio/screen/profile-wizard?lang=en>; with information on their motivation, soft skills and feedback from selection interviews.
10. Student must fill the requested form B "ملحق" available at their university, in English.

## Airbus Internship Program 2024

*Internship in Modelling of a hybrid fuel cell/gas turbine system (SOFC-GT)*

What if YOUR professional adventure started with Airbus!

We offer an internship « **Modelling of a hybrid fuel cell / gas turbine system (SOFC-GT) (m/f)** » at Airbus Commercial in Saint-Martin-du-Fouch.

You will join the department in charge of engine performance.

Your internship will consist of: adapting the design of a hybrid fuel cell/gas turbine engine system to the needs of an aircraft like the A320, evaluate the performance and the weight of the fuel cell/gas turbine and integration of the fuel cell stack into the gas turbine, evaluate risks and preparation of a support for a disruptive propulsion system.

This internship will begin in March 2024 (date subject to flexibility)

### Main tasks and activities:

For your job support, you identify your professional objectives and develop your skills. You will contribute to the following:

- Understanding of current projects
- Cost adaptation to the needs of an A320
- Model built with PROTEUS, evaluate performance and weight
- Literature review of SOFC-GT to identify the most important ones

**AIRBUS**

## This internship will allow you to develop the following skills:

- Gain comprehensive knowledge of aircraft and propulsion system performance
- Disruptive system modelling

## Your Boarding Pass:

You are currently a Senior student (in Fourth or Fifth year) in faculty of an officially accredited university and currently pursuing a degree in the field of aeronautics with a specialization in Thermodynamics (or equivalent), and you will develop the following competences:

- Knowledge of turbomachines and thermodynamics
- Experience in programming (Fortran, C/C++, Matlab, ...)
- Experience with an engine cycle tool would be a plus (similar to PROOSIS)
- Rigorous - curious and self-contained
- With a sense of relational skills
- Able to analyze and synthesize

## Language skills:

- French : Fluent
- English : Fluent

Participating students will be selected based on criteria set by Airbus. For students to be considered for the Airbus Internship Program, they must adhere to the following criteria. As per Airbus guidelines, participating students are expected to be able to deliver on their projects and duties. The students should also be able to read and interpret technical drawings and job instructions. Lastly, participants should demonstrate accuracy, aptitude, quality awareness, in addition to autonomy and proactivity.

Students will be selected by adhering to the criteria included in this document.

## Criteria for application & selection:

1. Applicants must be Jordanian nationals.
2. Educational level: Senior student (in Fourth or Fifth year) in faculty of an officially accredited university, and currently pursuing a degree as conditioned in the internship description.
3. Students must be at least 21 years of age.
4. Student must have a cumulative GPA of 3.0 or above or its equivalent standard score or above.
5. Student must show proficiency in English (or French) and have completed the IELTS or the TOEFL test with a score of 5 or above for IELTS, 100 or above for the TOEFL internet-based test, or 250 for the computer-based test or 600 for the paper TOEFL based test.
6. Student must demonstrate the successful completion of, or be currently working on, a project showcasing an interest and skills in your field of study.
7. Student must demonstrate abilities:
  - A. To proactively deliver on their projects and duties as per the set guidelines.
  - B. Work out independently and iteratively.
  - C. In reading and interpreting the technical drawings and job instructions.
  - D. To demonstrate accuracy, aptitude, quality awareness.

## Requested Documents:

1. Students must submit their full transcripts in English.
2. Students must submit a demonstrated successful completion of, or currently be working on, a project with a short write up describing the project and its outcome (maximum 150 words) in English.
3. Students must write a letter in English expressing their interest to join the internship program by answering the following questions:
  - A. Why should CNES choose my project? (Maximum 150 words)
  - B. How does my project benefit CNES and Jordan? (Maximum 150 words)
4. Students who have conducted research with a faculty member are invited to submit any paper(s) or publication(s) that came out of that effort.
5. Students must submit two letters of recommendation from their university faculty that they have worked closely with, or taken courses with, at their university specifically detailing the applicant's performance and why they qualify as a strong candidate for this internship.
6. Generic letters will not be accepted.
7. Students must submit a copy of their passport, valid at least until December of 2024.
8. Students must submit 1 passport photo.
9. Students must submit their resumes in English, in Europass format as a hard copy, to match the Europass style: <https://europa.eu/europass/eportfolio/screen/profile-wizard?lang=en>, with information on their motivation, soft skills and feedback from selection interviews.
10. Student must fill the requested form B "مطلبق" available at their university, in English.

# Airbus Internship Program 2024

*Internship in landing gear data analysis (m/f)*

What if YOUR professional adventure started at Airbus !

Are you looking for an internship? We would like to give you the opportunity to work on a real world project in a multidisciplinary team and contribute to the development of our products and services.

We offer you a 4-month «Landing gear data analysis (m/f)» internship in our Toulouse office.

You will join the Data driven service and maintain an efficient data collection system for the landing gear operation and lead predictive maintenance algorithms on the aircraft's landing gear (main and auxiliary).

Your internship will consist of developing data analytics solutions to detect and predict landing gear anomalies.

This internship will begin in April 2024 (date subject to flexibility).

## Main tasks and activities:

What is the concern with aircraft tire wear?

In today's aircraft, tires life time is a critical parameter as significant amount of maintenance cost is due to tire wear. To improve these results, it is necessary to place the right sensors on the tire to collect the right data and to analyze the impact on aircraft operations.

How will you contribute to improve the situation?

The wear of the tire is influenced by numerous parameters such as aircraft speed, altitude, temperature, runway conditions, etc. Your task will be to identify the key parameters and build a predictive model that will combine flight data and maintenance data.

**AIRBUS**

This internship will allow you to develop the following skills:

- Data analytics and/or coding skills
- Increase of "Python" language knowledge
- Implementing machine learning algorithms applied to predictive maintenance
- General knowledge of aeronautical maintenance and Landing Gears maintenance in particular

### Your boarding pass:

You are currently a Senior student (in Fourth or fifth year) in faculty of an officially accredited university and currently pursuing a degree in Data Science, and you obtained previously, the following hard and soft skills:

- Autonomy in computer sciences, ideally in data analytics and/or coding activities
- Strong knowledge of Python language, supervised learning, analytic tools and neural Networks
- Knowledge of aircraft maintenance and operability is a plus
- Good communication skills as well as the ability to provide constructive feedback and to generate and accept logical arguments
- You are assertive, autonomous, and thirsty to learn, grow, and share

### Language skills:

- French - intermediate
- English - intermediate

Participating students will be selected based on criteria set by Airbus. For students to be considered for the Airbus Internship Program, they must adhere to the following criteria. As per Airbus guidelines, participating students are expected to be able to deliver on their projects and duties. The students should also be able to read and interpret technical drawings and job instructions. Lastly, participants should demonstrate accuracy, aptitude, quality awareness, in addition to autonomy and proactivity.

Students will be selected by adhering to the criteria included in this document.

## Criteria for application & selection:

1. Applicants must be Jordanian nationals.
2. Educational level: Senior student (in Fourth or Fifth year) in faculty of an officially accredited university and currently pursuing a degree as conditioned in the internship description.
3. Students must be at least 21 years of age.
4. Student must have a cumulative GPA of 3.0 or above or its equivalent standard 83% or above.
5. Student must show proficiency in English (or French) and have completed the IELTS or the TOEFL tests with a score of 5 or above for IELTS; 100 or above for the TOEFL internet-based test, or 250 for the computer-based test or 600 for the paper TOEFL based test.
6. Student must demonstrate the successful completion of, or be currently working on, a project showcasing an interest and skills in your field of study.
7. Student must demonstrate abilities:
  - A. To proactively deliver on their projects and duties as per the set parameters.
  - B. Work autonomously and in teams.
  - C. In reading and interpreting the technical drawings and job instructions.
  - D. To show accuracy, aptitude, quality, eagerness.

## Requested Documents:

1. Students must submit their full transcripts in English.
2. Students must submit a demonstrated successful completion of, or currently be working on, a project with a short write up describing the project and its outcome (maximum 150 words) in English.
3. Students must write a letter in English expressing their interest to join the internship program by answering the following questions:
  - A. Why should CNES choose my project? (Maximum 150 words)
  - B. How does my project benefit CNES and Jordan? (Maximum 150 words)
4. Students who have conducted research with a faculty member are invited to submit any paper(s) or publication(s) that came out of that effort.
5. Students must submit two letters of recommendation from their university faculty that they have worked closely with, or taken courses with, at their university specifically detailing the applicant's performance and why they qualify as a strong candidate for this internship.
6. Generic letters will not be accepted.
7. Students must submit a copy of their passport, valid at least until December of 2024.
8. Students must submit 1 passport photo.
9. Students must submit their resumes in English, in Europass format as a hard copy, to match the Europass style: <https://europa.eu/europass/eportfolio/screen/profile-wizard?lang=en>; with information on their motivation, soft skills and feedback from selection interviews.
10. Student must fill the requested form B "ملحق" available at their university, in English.

## Airbus Internship Program 2024

*Internship in Digital solutions for Airframe Technical Integration (m/f)*

What if YOUR adventure started with at Airbus!

We offer you the opportunity to immerse in a world leading company in its field. You will be at the forefront of research and innovation.

An internship offer entitled « **Internship on Digital solutions for Airframe Technical Integration (m/f)** » is proposed within Airbus Aircraft Division Engineering Department.

You will join the dynamic department of Airbus Digital Integration, which is closely connected with the aircraft and aircraft project (A320neo, A320XLR, A350-900). The department is composed of several teams, each with a primary role. You will be part of a team of a total number of 10 people, all of them are working on a project by groups. You will be a part of a team which will be your main priority.

Your internship will consist of creating digital and technical solutions for the integration of the aircraft integration of the aircraft.

**This internship will begin in March 2024 (date subject to flexibility)**

The position requires a university degree in a relevant field. It is an opportunity to gain practical experience.

### **Duties and Responsibilities:**

You will contribute to the following activities:

- Better understanding of the operational business and Airbus Aircraft Division
- Discovery of the Airframe Technical Integration process
- Creation of a status mapping of the existing digital solutions and digital integration of the aircraft in the pipeline. Assessment of the needs and proposal of digital solutions to be developed in the future.

**AIRBUS**

- Creation of Digital solutions for automating tasks and testing phase of these solutions
- Development of tutorials for an efficient deployment of the developed digital solutions within the department
- Writing of the internship report and presentation
- Proposition of a way forward on digital solutions for the department

**This internship will allow you to develop the following skills:**

- Company Knowledge and Aeronautical field
- Airframe Technical Integration jobs knowledge
- Application of coding, data processing knowledge on concrete projects
- Collaboration within multicultural teams
- Project Management
- Synthesis skill through the tutorials, internship report and presentation

### **Skills & Prerequisites:**

You are currently a Senior student (in Fourth or Fifth year) in faculty of an officially accredited university and currently pursuing a degree in Information technology (Systems, Cloud Computing, Artificial Intelligence, Data Science, Robotic Process Automation), ...

**You have the following competences:**

- Coding Knowledge in main languages (SQL, Java, html, Google Apps Script/ App Studio)
- An experience in coding would be a plus
- Be familiar with Data Information Systems
- Good relationship and communication ability
- Team working spirit
- Organizational skills

### **Language skills:**

- French - Fluent
- English - Fluent

Participating students will be selected based on criteria set by Airbus. For students to be considered for the Airbus Internship Program, they must adhere to the following criteria. As per Airbus guidelines, participating students are expected to be able to deliver on their projects and duties. The students should also be able to read and interpret technical drawings and job instructions. Lastly, participants should demonstrate accuracy, aptitude quality awareness, in addition to autonomy and proactivity.

Students will be selected by adhering to the criteria included in this document

## Criteria for application & selection:

1. Applicants must be Jordanian nationals.
2. Educational level: Senior student (in Fourth or Fifth year) in faculty of an officially accredited university and currently pursuing a degree as conditioned in the internship description.
3. Students must be at least 21 years of age.
4. Student must have a cumulative GPA of 3.0 or above or its equivalent standard (83% or above).
5. Student must show proficiency in English (or French) and have completed the IELTS or the TOEFL tests with a score of 5 or above for IELTS, 100 or above for the TOEFL internet-based test, or 250 for the computer-based test or 600 for the paper TOEFL based test.
6. Student must demonstrate the successful completion of, or be currently working on, a project showcasing an interest and skills in your field of study.
7. Student must demonstrate abilities:
  - A. To proactively deliver on their projects and duties as per the set goals.
  - B. Work a team member and in teams.
  - C. In reading and interpreting the technical drawings and job instructions.
  - D. To show accuracy, aptitude, quality awareness.

## Requested Documents:

1. Students must submit their full transcripts in English.
2. Students must submit a demonstrated successful completion of, or currently be working on, a project with a short write up describing the project and its outcome (maximum 150 words) in English.
