

**The University of Jordan
School of Engineering
Department of Computer Engineering**

Course: Project(1) – 0907598 (1 Cr. – Core Course)

Catalog Data: A problem is assigned to the student in one of the different electrical engineering tracks. He will be asked to rely on himself to find a solution for the problem (which could be practical or theoretical). It is expected from the student to develop the abilities of research and independent work and to train himself to observe a timetable to perform his project and to be capable of explaining and expressing his findings in a professional manner.

Co-requisites by Course: 120 Credit hours
